All letters for publication should be written on one side of the paper only.

The Daily Press.

HONGKONG, OCTOBER 20th, 1877.

This paper with the "largest circulation," yet the *Daily Telegraph*, has in one of its characteristic articles favored its readers with a column on the action of the Chinese Envoy on the opium question. Directed of the redomestication with which it abounds, and the somewhat stale allusions to the "Brother of the Sun and Moon" and the "Vermilion Pencil" with which it is garnished, the article in question is reduced to a rather roundabout denunciation of the opium traffic. It brings forward, however, not a single fresh argument, nor does it state single fact. It repeats, what has been often asserted before and as often disproved, the statements concerning the ill-effects of the drug on smokers; it brings forward the old story that "opium smuggling has led to more than one costly and sanguinary war between Great Britain and China;" and it dwells with great earnestness on the waste of time resulting from indulgence in the opium pipe. Our English contemporary is very glad to hear that His Excellency Kwon Su-ao-tao, at whose instance the recent Imperial Decree forbidding opium smoking in China at the expiration of three years has been issued—is not addicted to the use of the drug, and puts him warmly on the back for his abstinence. It says—"The good must always be subject more of less to denunciation. It is the income-tax which they pay for being virtuous. Thus there will be little to astonish, although there may be much to regret, in the consummation of some quarters accusing the Chinese Ambassador of moderate indulgence in opium. We are glad, however, to find that the oulgers have been vigorously taken up for His Excellency by the correspondent of a contemporary, and that his innocence in the matter of opium has been placed beyond a doubt. Kwon Su-ao-tao may be considered, indeed, as a reformer after the pattern of Sir William Lawrence; that is, thorough. Not content with merely writing articles, as so many of his brother mandarins have done against the immorality of opium-smoking, he has combined example with precept, and so successful has been his crusade against the drug that in the locality which he honours by his residence when he is at home not a single opium-smoker is to be found. Again, on his appointment to his mission to this country the greatest care was exercised in the selection of the personnel of the Legation so as to exclude from its ranks any person tainted with the slightest suspicion of whiffing at the opium-pipe; and when in the fulness of time His Excellency returns to the Middle Kingdom, completely provided, as he doubtless will be, with albums of Mr. Astor's photographs and the printed transactions of the British Anti-Opium Association, he will be able, we trust, to accomplish great things." The photographs alluded to were taken under the direction of the member for Brighton, and represent men and women in the enjoyment of the pipe. The Chinese Ambassador in London will no doubt be much delighted to find himself the object of such commendations from the metropolitan gush, but the Anglo-Oriental Society for the Suppression of the Opium Traffic would probably prefer something more pronounced than the following query which with the *Telegraph* concludes its remarks—"Must it be reckoned as one of our national sins and scandals that we so encourage the Chinaman in his delectable vice, merely because it tends to increase the Indian revenue by selling opium to the Chinese; or are we justified in letting him alone, on the *coquet* opium principle, just as we let the British gin-drinker alone, between whom and his fellow victim, the Chinaman, there exists a strong family likeness, and who, on his part, contributes every year a very pretty quota to the British revenue?" We have no difficulty or hesitation in answering the question. The traffic in opium, like that in alcoholic liquor, is perfectly legitimate. Demand regulates supply, and no unfair efforts are used to stimulate or increase the demand. Opium, like alcohol, is a stimulant, and is only injurious, like alcohol again, when taken in excess. The mass of opium smokers, like the mass of those who drink spirits, are moderate consumers, and it would be unjust to deprive them of what they do not abuse for the sake of the few who have no command over their appetites. It has been attempted in the United States to control and suppress the drink traffic by legislation, but without success, and it is generally felt in England that any attempt to rob a man of his beer or other liquor would be an arbitrary interference with the liberty of the subject, which would be immediately and obstinately resisted. Any such legislation would, in fact, be sure to lead to a vast increase in the illicit sale of drink, entailing disastrous consequences. And the attempt—if it be ever really made—to put down opium smoking by force in China will equally fail. We do not,

however, believe that such a course is seriously intended. It is a very simple thing to promulgate an Imperial edict, but it is a different matter to enforce its observance. The Government of Peking can do much as it pleased, but it would require a very energetic exercise of its despotism to carry the edict into effect. And as yet we have no proof that it cherishes any sincere desire to procure the abolition of the habit. Its just acts and policy certainly do not convey such an impression, and we feel a conviction that the edict recently published was issued more for the sake of appearing virtuous and benevolent in the eyes of Western nations than from any other motive.

The twenty new constables who arrived on Thursday by the steamer *Glenn* were yesterday sworn into the Police service in the Police Court by the Hon. C. May.

We have to remind our readers that the last opportunity of seeing the Royal Illustrations of their amusing entertainment will be afforded to-night at the London Theatre.

We hear that one of the Chinese detectives has been expressing outrage in a case of alleged kidnapping, and that he will be charged at the Police Court sometime next week.

We are requested to announce that Mrs. Pope Hennessy will be "at home" on Monday, the 20th instant, and following Mondays, from four to six o'clock p.m. instead of on Wednesdays as heretofore.

We hear that during His Excellency the Governor's absence from Hongkong, the local police and military forces will be kept in the working of the police station. It is in contemplation to provide steam-launches for the winter police boat, and to carry a gun to put down attempts at piracy. The authorities are also thinking of abolishing the Police Chop and building a new station at Tsim-tai-tai.

Only one junk was in motion in the Supreme Court yesterday, and from it the jury derived no advantage as it was on the opposite side of the court. The case was a *quid pro quo* case, in which the plaintiff sought to put down attempts at piracy. The authorities are also thinking of abolishing the Police Chop and building a new station at Tsim-tai-tai.

The accused, a man named *Ng*, was charged with being a conventional thief. The case was a *quid pro quo* case, in which the plaintiff sought to put down attempts at piracy. The authorities are also thinking of abolishing the Police Chop and building a new station at Tsim-tai-tai.

MANILA.
We translate the following items from Manila papers—
A detailed report of the sugar from the Philippines to San Francisco is recommended as being a good commercial speculation.
Advices from Pangasinan state that a cloud of locusts had passed over the district between San and Lingayen.
The ship *Agulhas* has left Manila for Santander with a cargo of tobacco.
A detailed report of the sugar from the Philippines to San Francisco is recommended as being a good commercial speculation.

It is satisfactory to be able to send another proof that the Chinese are not averse to the employment of European machinery provided we can introduce it in a manner which they can tolerate and come to their advantage. It has been announced that a company has been formed for the purpose of working in China what is known as the "Wetrick" patent process for refining sugar. The board of directors is a strong one, and the company has been formed by practically acquainted with sugar refining, so that there is every reason to hope that it may be the means of establishing what will ultimately be a very important branch of the Chinese trade.

It is satisfactory to be able to send another proof that the Chinese are not averse to the employment of European machinery provided we can introduce it in a manner which they can tolerate and come to their advantage. Some of the poor women gave a most graphic description of the way their husbands and fathers were killed and once they were killed, a wretched and cruel death. They all said that it was a week after the death of their husbands that they were taken to the place where they were to be executed. They were all taken to the place where they were to be executed. They were all taken to the place where they were to be executed.
